(a) A question carries its own answer key

Maya buys 7 pens at $3 each and pays with a $50 bill. How much change does she get?

candidate	inverse problem (one given hidden)	label: $3
$29 →	… 7 pens at z each … Her change is **$29**. Find z.	$z = 3$ ✓
$23 →	… 7 pens at z each … Her change is **$23**. Find z.	$z \approx 3.86$ ✗

(b) Expected update of p under each reward
